

## DOUBLED AND TWISTED VISCOSE FILAMENT YARNS

'Lustrex' beautifully combines two or more single yarns twisted to enhance smoothness, evenness, lustre and compactness of yarn. The double twisted yarn may be used as white or dyed yarn for embroidery and other ornamentation applications. Typically ranging across 2/110 Denier to 2/150 Denier, Raysil Lustrex has relatively higher heat resistance, performs efficiently on high-speed embroidery machines, makes consistent & smooth stitches leading to a rich fuller look and smooth touch. A key to fabric ornamentation and Indian women's ethnic wear cannot be imagined without this.

Raysil Lustrex is known to add subtle richness to the surrounding, thereby creating the warmth and luxury in homes. It adds the bling to the garment – is a magic wand for the craftsmen and the glamour quotient for the fashionista.
